 PROFILE

Product-minded software engineer specializing in generative AI, LLM fine-tuning, and distributed systems architecture. Proven track record of architecting and shipping production-grade platforms, from neural networks to cloud infrastructure, that solve complex problems across healthcare, SaaS, and enterprise sectors. Adept at leading end-to-end development, deploying highly scalable solutions that drive measurable business impact.

CORE COMPETENCIES

- AI & Machine Learning: Generative AI, LLM Fine-Tuning, Computer Vision, MLOps.
- Architecture & Backend: Microservices, Client-Server, REST, Node.js, Python (Django, FastAPI).
- Frontend Engineering: React, Next.js, React Native, TypeScript.
- Cloud, Data, & DevOps: AWS/Azure, Docker, Kubernetes, CI/CD, PostgreSQL, real-time WebSockets, and serverless.

 PROFESSIONAL EXPERIENCE

2024 – present
Kampala, Uganda

AIBOS UG

Software Engineer

- Generative AI Platform (WHOM AI): Architected a production-grade fashion photography platform (Stable Diffusion/ComfyUI, Next.js, Python). Generated 1,000+ studio-quality images, eliminating costly on-location shoots.
- Computer Vision Systems (Blueprint AI): Engineered a Python-based blueprint analyzer to automate drawing interpretation and bill of materials generation, reducing manual review time by 80%.
- Architecture & DevOps: Led system design and testing across various initiatives. Optimized CI/CD pipelines via Docker, cutting deployment times by 30% and ensuring high availability.

2024
Kampala, Uganda

Native Innovations

ERP Developer

- Enterprise Software (SME ERP Suite): Architected and deployed a comprehensive SME ERP system (Django, PostgreSQL, Docker) managing inventory, financials, and HR.
- Process Optimization: Streamlined workflows with custom dashboards, reducing manual administrative tasks by 30% and saving clients 10+ hours/month. Led onboarding for 50+ enterprise users.

2020 – 2024
Kampala, Uganda

Independent AI & Full-Stack Developer

- Healthcare AI (AI Skin Diagnosis): Developed a CNN-powered mobile dermatological screening app (TensorFlow, React Native, FastAPI) delivering clinical-grade assessments with 85% accuracy.
- Platform Engineering (Cirqoo & Wasp Dashboard): Built a scalable social discovery app and a real-time, WebSocket-first business messaging hub to automate B2B conversations.
- IoT & Enterprise SaaS: Engineered a real-time air quality monitoring IoT system and multi-tenant platforms (FactoryAirWatch & MEL System) for globally scaling organizations.

2023 – 2025
Kamapla, Uganda

- Microsoft**
Microsoft Student Ambassador
- Conducted tech workshops for 100+ students, promoting Azure and GitHub best practices
 - Collaborated with global peers to drive community-based innovation

2023 – 2024
Kamapla, Uganda

- DICTS Makerere University**
IT Intern
- Provided on-site training, elevating departmental IT skills by 40%
 - Webmail Mobile App – Implemented robust backend caching for 5,000+ daily users

 EDUCATION

01/2022 – 02/2026
Kampala, Uganda

- BSc in Software Engineering**
Makerere University
- *Key Coursework:* Artificial Intelligence, Systems Architecture, Database Systems, and Cybersecurity.
 - *Honors:* Finalist in Makerere AI Competitions; secured grant funding for the AI Skin Diagnosis project.

 SKILLS

Programming Languages Python, JavaScript, TypeScript	Web & Backend Development Django, React, Next.js, FastAPI	DevOps & Containerization Docker, Kubernetes, Git
Systems Integration ERP solutions, API integrations, IoT connectivity	Domain Expertise Artificial Intelligence, IoT, Digital Transformation	Team Collaboration Cross-functional teamwork, end-to-end project delivery, agile methodologies

 CERTIFICATES

Postman API Fundamentals (2023) • Microsoft Student Ambassador (2023–2024)

 LANGUAGES

English
