Team Allocation & Organization Structure

A report for your confirmation.

Prepared for Mr. Eiji Watanabe · Prepared by the AIBOS Japan Team · 26 May 2026

This report sets out the allocation of AIBOS members following the candidate calls and team review, together with the underlying assumptions and the proposed organization structure, for your confirmation. It is organised in three parts — who is allocated where, the assumptions behind that allocation, and the structure we propose — followed by the decisions we need from you and the next steps already in motion.

1 TEAM ALLOCATION

9 Coming to / already in Japan (4 here · 5 selected)	10–15 Target headcount for Japan, per your direction	16 Continuing Uganda team (working remotely)
5 Resigned or stepping away	≈30 Total members reviewed	3 Proposed teams (director · students · developers)

1.1 Team Coming to Japan

The core team is already in Japan. Five further members have been selected to join, each willing and sponsored by an inviting member who takes direct responsibility for them.

MEMBER	PROJECT	STATUS	PASSPORT	YELLOW FEVER	MOTIVATION & NOTES
Andrew Luswata	EMS	IN JAPAN	—	—	Core team.
Ambrose Alanda	Create Project	IN JAPAN	—	—	Core team.

MEMBER	PROJECT	STATUS	PASSPORT	YELLOW FEVER	MOTIVATION & NOTES
Kalema Martin	Oversees projects (EMS, Framea, Focust)	IN JAPAN	—	—	Core team.
Kevin Mugarura	AI Super Agent	IN JAPAN	—	—	Core team.
Timon W. Mesulam	Focust / AI Super Agent	SELECTED	Yes	Pending	Skilled, proactive full-time engineer; left his studies to focus on work and is ready to relocate.
Namugga Martha	GA	SELECTED	Yes	Yes	Hardworking and skilled; keen to join the development team, motivated chiefly by career growth. A few questions on role and the post-visa path are being addressed.
Joshua Muzuva	Create Project	SELECTED	Yes	Yes	Dependable, with a strong work ethic and leadership potential; open to relocating.
Muwanguzi Jovic Biralo	Matsumoto-san's project	SELECTED	Yes	Pending	Solid frontend skills and continually improving; motivated to build together with the team. Ready within one to two weeks (collecting his transcript for the work-visa path).
Kire Constantine	Focust	SELECTED	Applying	Applying	Talented early-career developer on a planned gap year (changing course to software engineering); sees Japan as a stronger environment to learn and grow with the team. Applying for documents (express).

1.2 Continuing Uganda Team — Remote

These members continue with AIBOS remotely from Uganda. Individual statuses are still being confirmed as outreach continues; the list reflects our current understanding. Two points are worth drawing out: several are people we would gladly have invited to Japan but who are staying to complete their studies or meet family responsibilities, and our General Affairs members can support Uganda-side management while the structure stabilises.

WANTED FOR JAPAN — STAYING TO COMPLETE STUDIES OR FAMILY RESPONSIBILITIES

MEMBER	PROJECT	YEAR	NOTES
Tusiime Mark	Urban Flooding	Year 2	Talented, collaborative and self-driven; completing his degree (one year remaining). A call is scheduled to keep him close.
Joshua Prince Aita	Create Project	Year 2	Keen to join the Japan team, but continuing his studies due to family commitments.
Wamani Joshua	Focust	Year 2	Government-sponsored; must complete his studies to retain his scholarship (confirmed with his parents).
Ogenrwoth Jim Frank	Focust	Year 3	A family breadwinner with responsibilities in Uganda; continuing his studies.
Otai Joseph	Create Project	Year 2	Open to the opportunity; after consulting family, the decision was to remain and continue studying for now.

CONTINUING REMOTE TEAM

MEMBER	PROJECT	YEAR	NOTES
Ahwera Shifrah	GA	Graduate	Reliable contributor; on General Affairs and able to support Uganda-side management and operations.
Masaba Shamsa	GA	Graduate	Runs GA operations and supports development; can help carry Uganda-side management.
Shakiran Nannyombi	AI Super Agent	Year 3	Dependable and eager to learn, gets things done. A community-based leader with strong networks — well placed to be AIBOS's talent-outreach point at Makerere.
Muwanguzi Alvin Kiggundu	Focust	Year 3	Adaptable and eager, with recent certifications and infrastructure work (Terraform); delivers well with AI support. The strongest of the reviewed pool — selected by all four reviewers — and a class leader who can help bring in bright candidates.
Lauben Mpairwe	Create Project	Year 4	Technically capable; working on team communication and consistency.
Kisakye Martha Janepher	AI Video Platform	Graduate	Steady contributor at a moderate level, working remotely.
Konso Vanessa Rebecca	EMS	Graduate	Long-tenured and dependable; a consistent executor on EMS.
Aule Ian	EMS	Year 3	A strong, accountable collaborator with timely communication. Relocating to Germany in June, so transitioning out of the team.
Yapyeko Rebecca	Focust	Year 4	Reliable, engaged QA on the government project with a good attitude; frontend skills still developing.

MEMBER	PROJECT	YEAR	NOTES
Salimu Kabogere	AI Video Platform	Year 3	Entry-level engineer (still in school); produces real output with AI support; technical breadth developing.
Namutebi Sulaina	GA	Year 2	Early in her development; skills still forming.

1.3 *Resigned*

The following members have resigned or are stepping away. In every case the relationship has been kept warm, and most remain open to future collaboration.

MEMBER	SITUATION	NOTES & RELATIONSHIP PLAN
Fred Sseginda	Signed with URA (government)	His hesitation is about rebuilding trust after having resigned once — not pay. He values the goodwill on the Japan side, with Matsumoto-san advocating for him. Being re-approached; door kept firmly open.
Turyasiima Crispus	Took a URA role	Confirmed his resignation after reflection; declined warmly and offered to support ad hoc when available. Prefers low-pressure, one-to-one contact. To be revisited in about a month.
Masembe Sendi Joseph	Resigned	His concern is transparency and how feedback is handled, not pay. Open to staying on two conditions — remote work and removal of the non-compete clause — at current pay. His reason for not relocating is known to Yuichi-san. See decision point below.
Nabasa Rodrick	Pursuing local ventures	Declined relocation to build locally (farming and real estate), while still coding. Warm relationship; door kept open.
Aheebwa Steven	Resigned	Stepped away for family reasons. Relationship maintained.

2 ASSUMPTIONS AND REQUIREMENTS

These are kept deliberately separate: requirements are what you directed; assumptions are what the team has inferred and would like you to confirm.

2.1 *Requirements — as directed*

- Invite the selected Uganda members to Japan as soon as possible.
- Prioritise members of high trust for long-term collaboration; trust is weighted above current skill level.

- Each member brought to Japan is the direct responsibility of an inviting member.
- Establish three sales teams on the director / students / developers model.
- Generate stable income from government contracts to cover the company's running costs.

2.2 Assumptions — to be confirmed

- An overall baseline of approximately 30 people.
- 10–15 members in Japan; 9–12 developers retained in Uganda; about 3–4 developers per team.
- No Uganda office for roughly June–October; a university space is a possibility, but unconfirmed.
- No C/D-rank developers based in Japan.
- Initial entry on a tourist visa, with a work visa to follow (which may require an academic transcript).
- Tier naming standardised as A / B / C / D.

3 PROPOSED ORGANIZATION STRUCTURE

Three teams are proposed. Each team comprises:

- One Japanese director (Inaba-san, Matsumoto-san, or Nishinaga-san);
- Two students based at the Kyoto office; and
- Three to four developers (C/D-rank) based in Uganda, working remotely.

Proposed structure: one founder, three director-led teams in Japan (each with two Kyoto-based students), and Uganda-based development pods executing remotely.

How the structure operates

- The directors and students lead sales, focusing on government contracts; the Uganda developers handle execution.
- This is intended to produce stable cash flow — an indicative profit target of roughly \$30,000–\$40,000 — to cover the company’s running costs.
- The talented members in Japan are thereby freed to focus on internal and moonshot projects, stepping in only when a team is at risk of missing a deadline.
- Initially, the Japan-based members help train the Uganda developers as the structure stabilises.
- With no Uganda office assumed for June–October, the retained members work remotely during this period.

DECISIONS WE NEED FROM YOU

- **Structure.** Do you confirm the three-team structure and composition — one Japanese director, two Kyoto students, and three to four Uganda developers per team?
- **Assumptions.** Do you confirm the headcount and office assumptions in Part 2 (≈ 30 total; 10–15 in Japan; 9–12 in Uganda; no Uganda office June–October)?
- **Japan headcount.** Nine are confirmed for Japan (four already here plus five selected) — the low end of your 10–15 target. How would you like to proceed: re-approach the resignees (notably Fred), relax the target, or hold to best-of-the-best over filling every seat?
- **Fred’s transfer.** Should the promised transfer be sent regardless of his final decision? (We have proceeded with sending it.)
- **Remote & non-compete (Masembe).** Under a project-based (1099) contractor model, may a departed member work with AIBOS remotely while employed elsewhere in the same field? He would continue at current pay if the non-compete clause is removed.
- **Sequencing.** Should the government-contract income be stabilised before pursuing moonshot projects?

NEXT STEPS

#	ACTION	OWNER	STATUS
1	Complete passport / yellow-fever follow-ups for Timon, Jovic and Kire (express where needed).	Outreach team	In progress

#	ACTION	OWNER	STATUS
2	Address Martha's questions on role, post-visa path and growth.	Nate-san	In progress
3	Re-approach Fred and send the promised transfer.	Matsumoto-san	In progress
4	Confirm Masembe's terms, pending the non-compete decision.	Team	Pending
5	Maintain relationships with those who resigned; revisit Crispus in about a month.	Team	Ongoing
6	Complete status confirmation for the continuing Uganda team (availability, exam schedules).	Team	In progress
7	Finalise and append the organization-structure diagram.	Kevin	In progress
8	Keep the roster updated as confirmations arrive.	Team	Ongoing

This report reflects the confirmed allocations as of 26 May 2026 and supersedes earlier notes where they differ.
